

Naina Premani

Frontend engineer with nearly 3 years of experience building production React and Next.js apps for AI-powered real estate and healthcare platforms — component architecture, design systems, real-time interfaces, payments, and SEO. Comfortable owning features end-to-end with design, backend, and QA.

WORK EXPERIENCE

Altrr Software Services

Software Engineer

Sep 2025 - Present

- AI property advisory platform for Indian real estate (trythat.ai).
- Design system ownership: Own and maintain the shared component library used across all seven apps in the monorepo, built on Radix primitives and Tailwind with an enforced export API that keeps zones decoupled.
- Programmatic SEO: Built landing pages generated automatically from city, locality, and property-type combinations, rendered server-side with canonical URLs, JSON-LD, OpenGraph tags, and sitemaps, backed by content-quality checks that keep thin pages out and mark them "noindex, follow."
- AI chat and voice-driven data entry: Built the streaming chat UI with threaded conversations and error/expired-session handling, plus a voice-to-form flow where users describe a property aloud and get a pre-filled, editable listing.
- AI video generation: Built the AI video feature end-to-end, upload, preview, and library screens for turning photos into short marketing videos, with shared hooks for long-running background jobs.
- Home screen redesign: Led redesign of the authenticated home, including AI search entry, personalized activity/insight cards, and subscription management.
- Payments: Integrated Razorpay for paid document downloads, including order creation and server-side payment signature verification.

Mindbrowser

Software Engineer

Dec 2024 - Aug 2025

- Pune, India — digital product studio building healthcare and enterprise client software.
- Built and maintained React/Next.js UI features across multiple concurrent client engagements, working from Figma designs alongside backend and QA.
- Shipped features under strict delivery and compliance deadlines across concurrent projects, collaborating with cross-functional teams.
- Worked within healthcare product constraints, gaining exposure to Medplum and FHIR-based data models.

Metta Social

Junior Development Analyst

Jan 2024 - Nov 2024

- CSR platform for corporate clients.
- Developed reusable React components and integrated Strapi CMS.
- Built responsive layouts and accessible UI patterns, improving mobile engagement.
- Contributed to a React Native Android app alongside the Next.js web platform.
- Implemented Cypress E2E test coverage.

EDUCATION

Masai School, Bengaluru

Full Stack Web Development (Full-Time)

2022 - 2023

Fergusson College, Pune

BSc, Computer Science

2021

SKILLS

- React & Frontend: React 19, Next.js15 (App Router, SSR/ISR), TypeScript, JavaScript ES6+, HTML5, CSS3, DOM APIs, responsive design
- AI Product Engineering: Streaming LLM response rendering, conversation threading, voice-to-form flows, AI-assisted development (Claude Code, Cursor)
- State & Data: Zustand, TanStack Query, Redux Toolkit, React Context, GraphQL
- UI & Design Systems: Tailwind CSS v4, shadcn/ui, Radix UI, MUI, Framer Motion, Figma, component library architecture, enforced export APIs
- SEO & Performance: Programmatic SEO, JSON-LD structured data, canonical strategy, dynamic sitemaps, indexation control, OpenGraph, CDN caching
- Build & Tooling: Turborepo, pnpm workspaces, Vite, Webpack, Turbopack, Docker, Git, GitLab.
- Backend & Integrations: Node.js, Express, REST APIs, NextAuth, Razorpay
- Testing: Cypress, E2E automation, unit testing (Vitest/Jest)
- Ways of Working: Agile/Scrum, code reviews, merge request workflow, cross-functional collaboration
